^aPatient

^bVoltage applied between central electrodes and peripheral electrodes (C-P), peripheral electrodes (P-P) and opposite electrodes (D) in 4-needle diamond configuration.

^cPercentage of tissue covered at the reversible electroporation threshold (RE = 400 V/cm)

^dPercentage of tissue covered at the irreversible electroporation threshold (RE = 800 V/cm)

^eAverage electric current between activated pairs of needles
