

Supplementary Table 1. IHS Diagnostic Criteria for Tolosa-Hunt Syndrome (ICHD)

IHS Diagnostic Criteria for Tolosa-Hunt Syndrome⁸	
A. Unilateral headache fulfilling criterion C	
B. Both of the following: 1. Granulomatous inflammation in cavernous sinus, superior orbital fissure or orbit, demonstrated by MRI or biopsy 2. paresis of >1 of the ipsilateral CN III, IV, and/or VI.	
C. Evidence of causation demonstrated by both of the following 1. Headache has preceded paresis of the CN III, IV, and/or VI nerves by <2 weeks, or developed with it. 2. Headache is localized around the ipsilateral brow and eye.	
D. Symptoms not better accounted for by another ICHD-3 diagnosis	

CN=cranial nerve; ICHD= The International Classification of Headache Disorders;

MRI=magnetic resonance imaging
