

Supplementary material

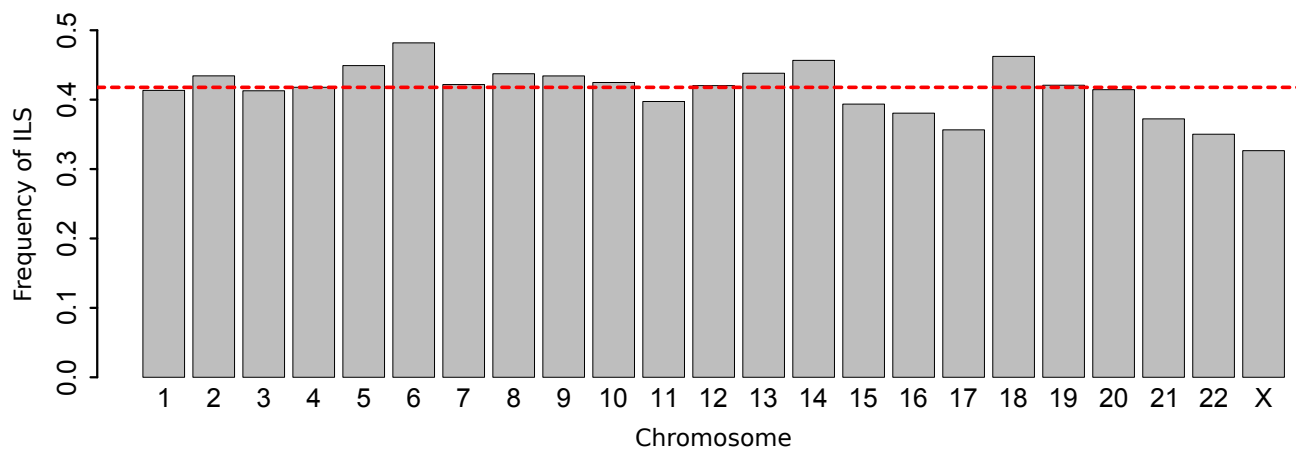

The estimated pacemaker for great apes supports the hominoid slowdown hypothesis

Beatriz Mello and Carlos G. Schrigo

Department of Genetics, Federal University of Rio de Janeiro, RJ, Brazil

biaumello@gmail.com

1) Variation in ILS across chromosomes. Each vertical bar represents the frequency of gene trees that did not match the species tree. The dashed horizontal red line indicates the mean frequency of ILS across autosomes. The X chromosome shows the lowest frequency of ILS.

2) List of genomic regions from
Orthomam database used in
this study.
