

Online supplement material: Correlations among Study Variables

	1	2	3	4	5	6	7	8	9	10	11	12	13	M	SD
1.Age	1													16.36	1.88
2.Communication	-.14*	1												3.66	0.93
3. Cohesion	-.02	.72**	1											3.95	0.84
4. Flexibility	-.05	.56**	.59**	1										3.52	0.78
5. Disengagement	.03	-.57**	-.72**	-.53**	1									1.90	0.77
6. Chaos	.002	-.39**	-.48**	-.47**	.58**	1								2.22	0.98
7. Enmeshment	.13*	.02	.05	.04	.01	.11	1							2.52	0.98
8. Rigidity	-.15*	.15*	.14*	.14*	-.12	.01	.05	1						2.65	0.85
9. Engaging in sexting ^a	.37**	-.23**	-.12	-.08	.11	.03	.09	-.11	1					--	--
10. Sexting with partner ^b	.33**	-.17*	-.14*	.03	.12	.04	.09	-.06	.65	1				--	--
11. Number of people sexting	.35**	-.26**	-.17**	-.08	.15*	.11	.13*	-.16*	.75**	.55**	1			1.70	0.88
12. Non-consensual forwarding	-.05	-.07	-.07	.04	.11	.04	.19**	.04	.25**	.15*	.22**	1		1.02	0.10
13.Sexting emotion regulation	.20**	-.24**	-.17**	-.08	.19**	.11	.11	-.03	.30**	.19**	.43**	.11	1	1.32	0.67

Note 1: ** $p < .01$; * $p < .05$. N = 250 Item mean scores were computed for each variable.

^aEngaging in sexting was coded as 0 = No and 1 = Yes.

^bSexting with partner was coded as 0 = No and 1 = Yes ($n = 201$)
