

Supplemental table 2 Relationship between CDA gene polymorphisms and effectiveness of gemcitabine/cisplatin chemotherapy in Han patients and Uyghur patients with advanced NSCLC.

Genotype	Xinjiang Uyghur (n = 54)		P1	Chinese Han (n = 67)		P1	P2
	Effective	Ineffective		Effective	Ineffective		
A79C							
AA	25 (62.5%)	15 (37.5%)	0.031	23 (65.7%)	12 (34.3%)	0.016	0.772
AC	3 (30.0%)	7 (70.0%)		7 (35.0%)	13 (65.0%)		0.028
CC	0 (0%)	3 (100%)		3 (25.0%)	9 (75.0%)		0.565
G208A							
GG	16 (32.0%)	34 (68.0%)	1	29 (55.8%)	23 (44.2%)	0.281	0.016
GA	1 (33.3%)	2 (66.7%)		6 (40.0%)	9 (60.0%)		1

P1: Comparisons between genotypes within the same ethnic group; P2: comparison between Xinjiang Uyghur patients and Chinese Han patients with the same genotype.
