- ▶ if the participant is a patient, she/he tells him that “the objective of the questionnaire is to better understand the sex life of patients who feel sexually attracted to children” ;
- ▶ if the participant is a healthy volunteer of a research study, she/he tells him that “the objective of the questionnaire is to better understand the sex life of subjects who are to participate as controls in the study and will be compared to patients with pedophilic disorder; therefore, it is important that some of the questions to the patients be also asked to the controls.”

Then, the interviewer states that she/he is bound by professional confidentiality and that the answers to the interview shall be kept anonymously.

FREQUENCY OF PARAPHILIC SEXUAL BEHAVIORS IN THE LAST 4 MONTHS

NOTE. FOR MEN WHO HAVE BEEN FREED FROM PRISON LESS THAN 4 MONTHS BEFORE THE INTERVIEW, THE PERIODS THAT MUST BE TAKEN INTO ACCOUNT IN ORDER TO ASSESS THE FREQUENCY OF PARAPHILIC SEXUAL BEHAVIORS IN THE LAST 4 MONTHS ARE THE PERIOD THAT FOLLOWS RELEASE FROM PRISON AND THE PERIOD PRECEDING THE ARREST LEADING TO IMPRISONMENT. EXAMPLE 2: FOR A PARTICIPANT RELEASED 2 DAYS BEFORE THE INTERVIEW, THE INTERVIEWER MUST TAKE INTO ACCOUNT THE 4 MONTHS PRECEDING THE ARREST LEADING TO IMPRISONMENT.

- rape, that is to say, any type of sexual penetration forced upon another person, whether it is achieved with the penis, the fingers or a foreign body
- or any other sexual behavior that seemed deviant to you.

C) If you have watched erotic movies or videos (on the Internet or otherwise), do not take this into account in your answer to the next questions.

HAND OVER TO THE PARTICIPANT THE QUESTIONNAIRE OPEN AT THE PAGE THAT LISTS THE DEVIANT BEHAVIORS. THIS LIST IS ON PAGE 23.

For each behavior of this list, please check the YES or NO box depending on whether you have had, or not had, the corresponding behavior in the last four months.

IF THE PARTICIPANT HAS BEEN RELEASED FROM PRISON LESS THAN 4 MONTHS AGO, TELL HIM:

The four-month period that I ask you to take into account comprises the [n1] weeks before you were arrested and imprisoned, plus the [n2] weeks since you were released from prison.

NOTE. FOR MEN WHO HAVE BEEN FREED FROM PRISON LESS THAN 4 MONTHS BEFORE THE INTERVIEW, THE PERIODS THAT MUST BE TAKEN INTO ACCOUNT IN ORDER TO ASSESS THE FREQUENCY OF SEXUAL BEHAVIORS WITH CHILDREN IN THE LAST 4 MONTHS ARE THE PERIOD THAT FOLLOWS RELEASE FROM PRISON AND THE PERIOD PRECEDING THE ARREST LEADING TO IMPRISONMENT. F2. My next question focuses on sexual activities where a real child was present, whether ejaculation happened or not. By contrast, if you limited your behavior to imagining a child while you were masturbating, or to watching erotic photographs or movies showing children (on the Internet or otherwise), do not take this into account in your answer to this question. Take again the sheet of paper I gave you a short while ago. By “sexual activity with a child”, I mean any sexual behavior with a child, even if it seemed to you that the child was consenting and even if you did not have an ejaculation.

IF THE PARTICIPANT HAS BEEN RELEASED FROM PRISON LESS THAN 4 MONTHS AGO, TELL HIM:

The four-month period that I ask you to take into account comprises the [n1] weeks before you were arrested and imprisoned, plus the [n2] weeks since you were released from prison.

In the last 4 months, how many times altogether have you had a sexual activity with a child, whether or not ejaculation occurred?
