

Supplementary Table 5.

PCP burnout and associated outcomes

Outcomes	Association with PCP burnout
Lower quality of patient care	*
Medical errors	*
Lower job satisfaction	Y
High job stress	Y
PCPs leaving the practice (i.e., turnover)	Y
Lower patient satisfaction	N
Antibiotic prescribing for patients with ARI	N

Note. “Y” yes, associated with PCP burnout; “*” mixed whether there is an association with PCP burnout; “N” not associated with PCP burnout; PCP = primary care provider; ARI = Acute respiratory infections;
