

Supplemental Table. Conditional Probabilities of the 2-Latent-Class-Analytic Model of Experiencing Physical-Health Symptoms During the Past 30 Days ($N = 512$).

	Conditional Probabilities	
	Occasionally Sick ($n = 193$)	Healthier ($n = 319$)
Headaches or migraines	.86	.58
Dizziness or Faintness	.61	.16
Watery or itchy eyes	.80	.44
Rashes or ear infections	.22	.06
Sinus problems	.64	.32
Hay Fever	.51	.22
Chronic coughing	.34	.10
Sore throat, hoarseness, loss of voice	.36	.15
Canker sores	.20	.12
Hives, rashes, dry skin	.41	.15
Flushing, hot flashes	.35	.07
Asthma	.22	.05
Bronchitis	.08	.01
Difficulty breathing	.30	.08
Nausea vomiting (not deliberate)	.38	.10
Heartburn	.51	.26
Intestinal/stomach pain	.58	.23
Pain or aches in joints	.73	.34
Pain or aches in muscles	.73	.34
Fatigue, sluggishness	.98	.67
Hyperactivity	.36	.15
Restlessness	.82	.43
General Health Good or Better	.63	.91

Note. Conditional probabilities greater than .50 are in bold to ease interpretation.
