

**Supplementary Table S1. Adverse events during the 6 months after kidney biopsy**

	No induction N = 10	Induction N = 80			p
		CYC (N = 66)	MMF (N = 10)	Other (N = 4)	
Serious infection <sup>a</sup>	2	10	0	0	0.617
Lymphopenia (new onset) <sup>b</sup>	1	18	3	0	0.240
Neutropenia <sup>c</sup>	0	4	0	0	0.453

<sup>a</sup>Severe infections were defined as those requiring intravenous antibiotic or antiviral therapy.

<sup>b</sup>Lymphopenia was defined as fewer than 800 lymphocytes per cubic millimeter. <sup>c</sup>Neutropenia was defined as fewer than 1000 neutrophils per cubic millimeter. CYC: cyclophosphamide; MMF: Mycophenolate mofetil

Supplementary Figure 1. Change of GFR values at 6 months compared with baseline. Patients with renal function recovery (a) and without recovery (b).
