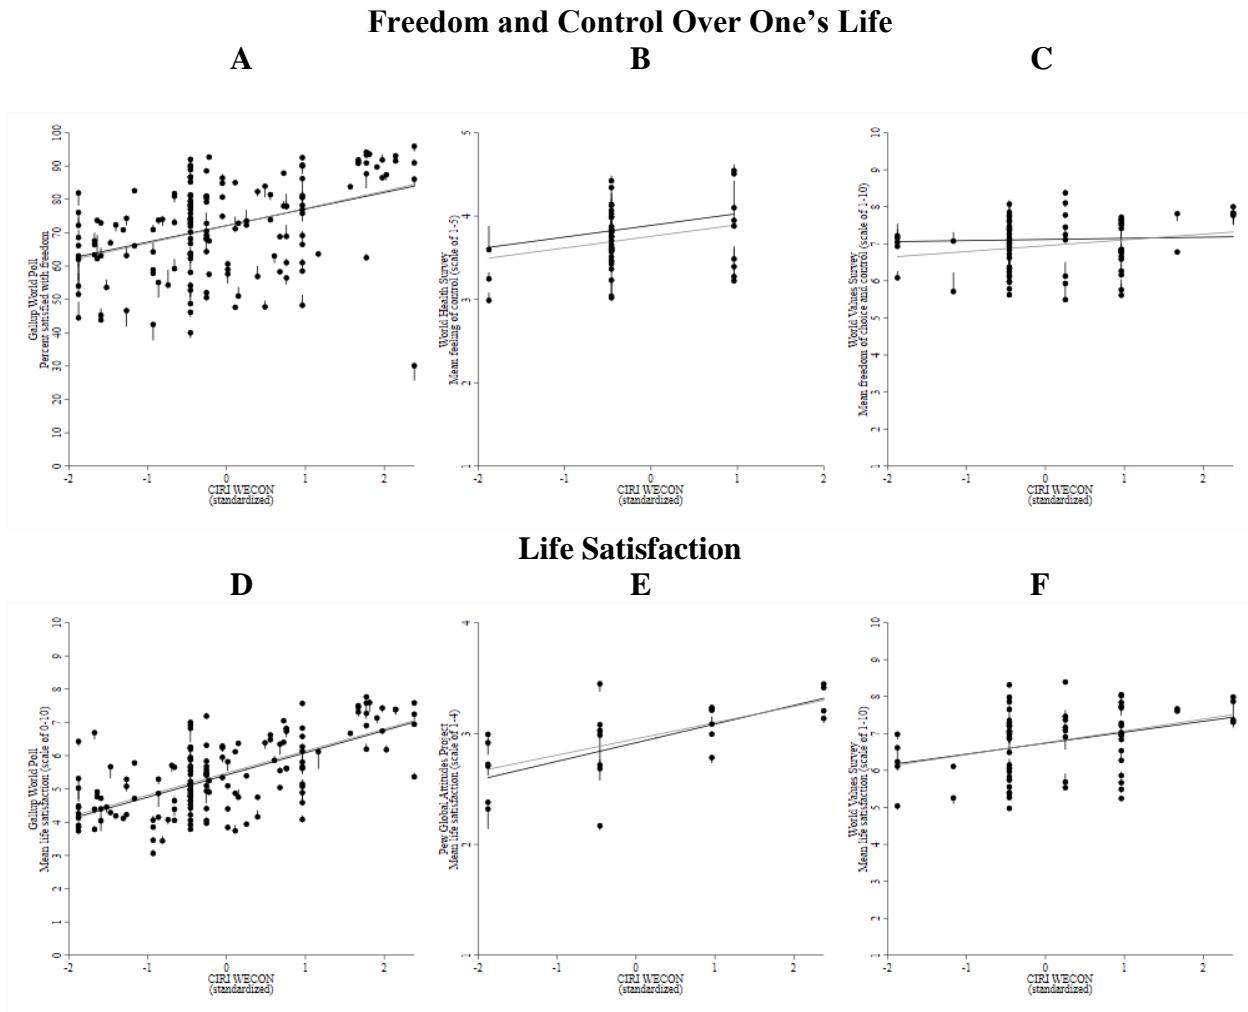

Fig. S1. Gender gap in life assessment, by index-equality (Gender Inequality Index, inverted)

(A) Gallup World Poll, (B) World Health Survey, (C) World Values Survey
 (D) Gallup World Poll, (E) Pew Global Attitudes Project, (F) World Values Survey

Dots indicate mean value for women in each country; tails indicate mean value for men in each country. Gray fitted lines represent the linear prediction of women's mean responses; black fitted lines represent the linear prediction of men's mean responses. The Gender Inequality Index has been standardized and inverted so that higher values indicate greater index-equality.

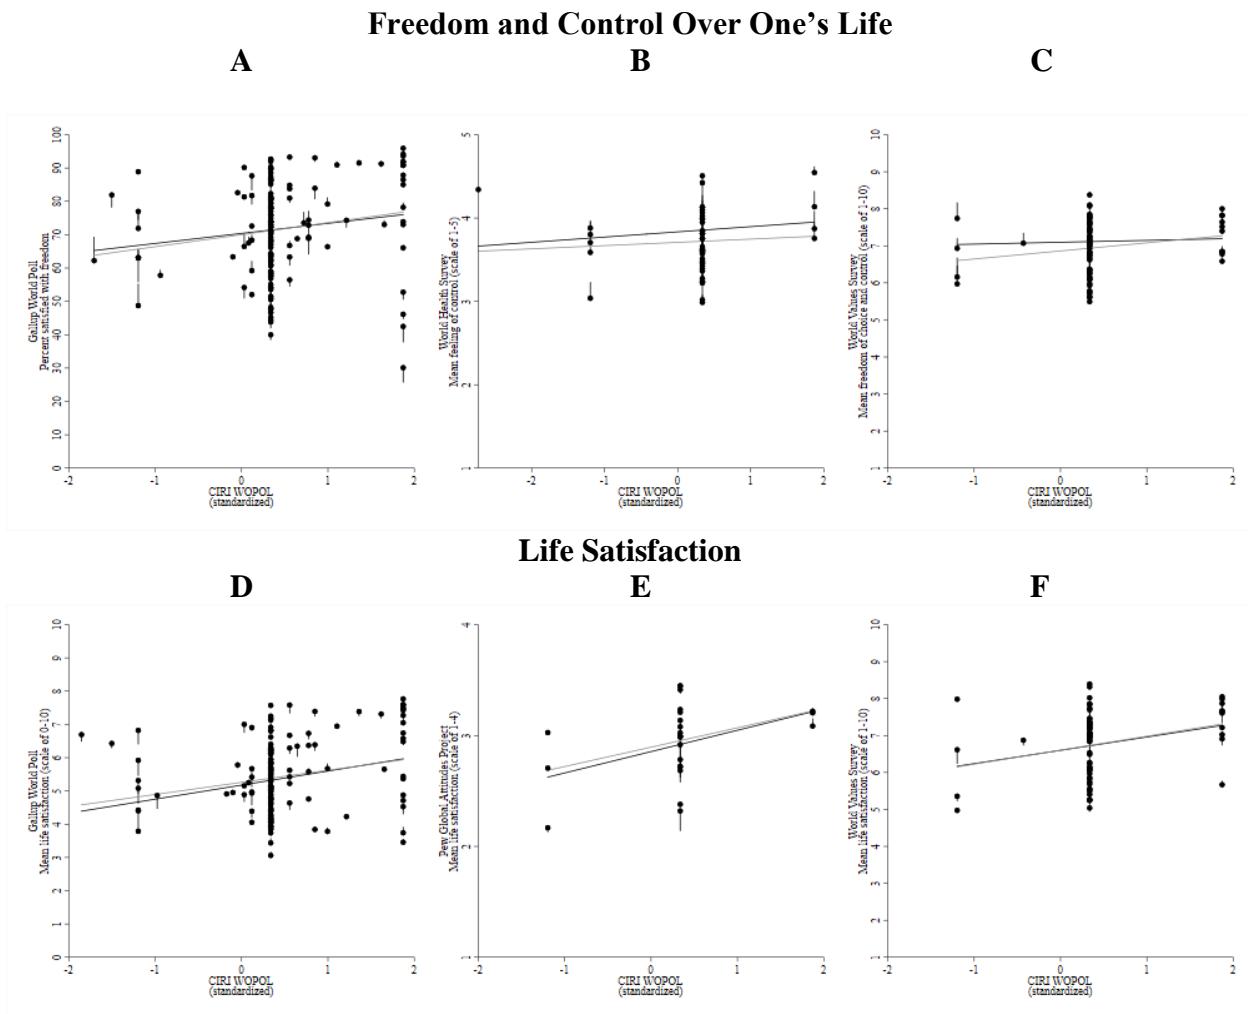

Fig. S2. Gender gap in life assessment, by index-equality (Cingranelli-Richards Women's Economic Rights index)

(A) Gallup World Poll, (B) World Health Survey, (C) World Values Survey
 (D) Gallup World Poll, (E) Pew Global Attitudes Project, (F) World Values Survey

Dots indicate mean value for women in each country; tails indicate mean value for men in each country. Gray fitted lines represent the linear prediction of women's mean responses; black fitted lines represent the linear prediction of men's mean responses. The Cingranelli-Richards Women's Economic Rights (CIRI WECON) index has been standardized.

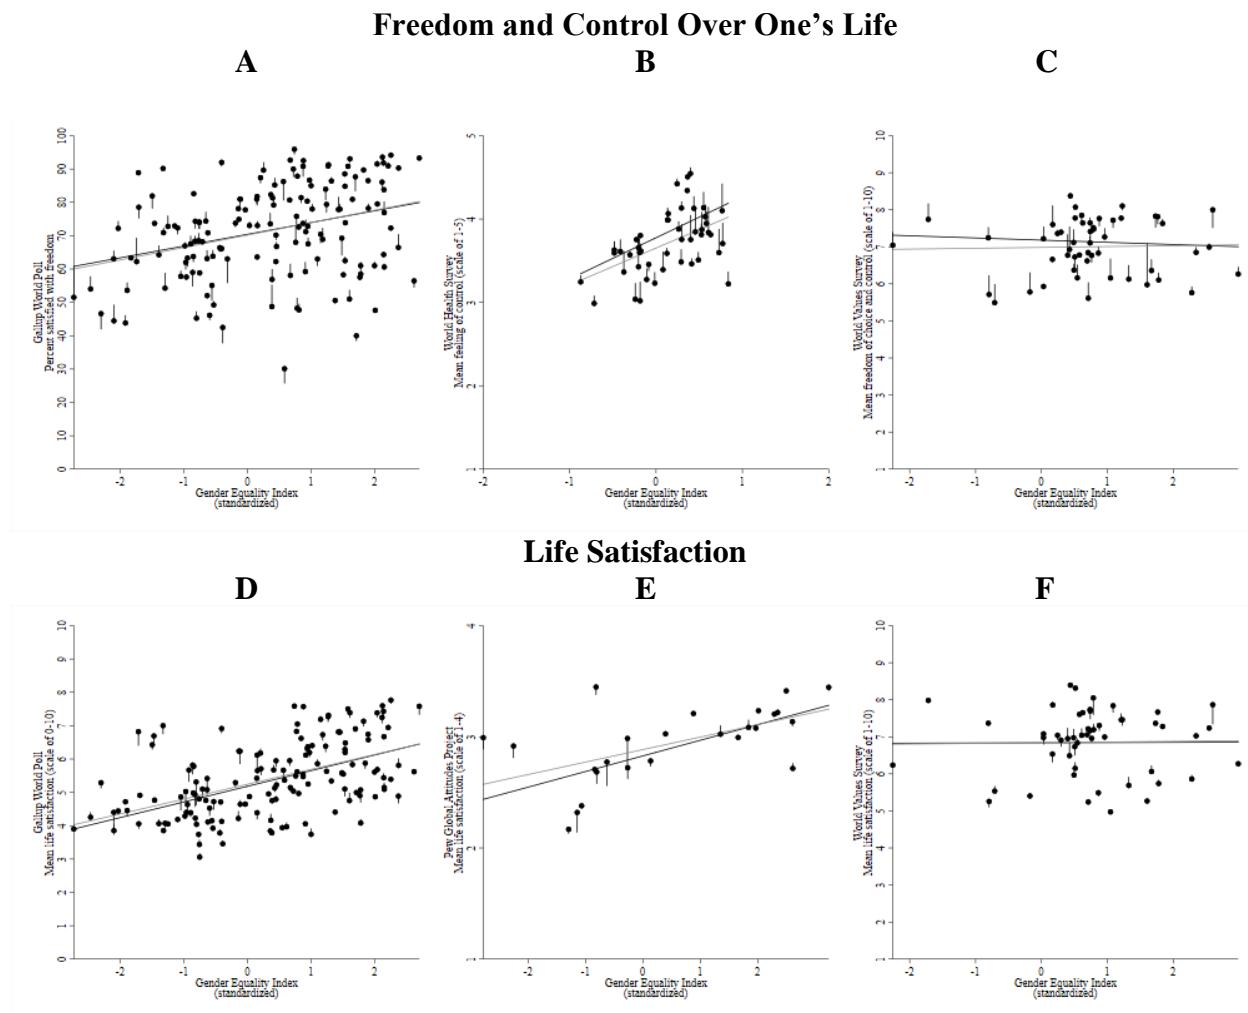

Fig. S3. Gender gap in life assessment, by index-equality (Cingranelli-Richards Women's Political Rights index)

(A) Gallup World Poll, (B) World Health Survey, (C) World Values Survey
 (D) Gallup World Poll, (E) Pew Global Attitudes Project, (F) World Values Survey

Dots indicate mean value for women in each country; tails indicate mean value for men in each country. Gray fitted lines represent the linear prediction of women's mean responses; black fitted lines represent the linear prediction of men's mean responses. The Cingranelli-Richards Women's Political Rights (CIRI WOPOL) index has been standardized.

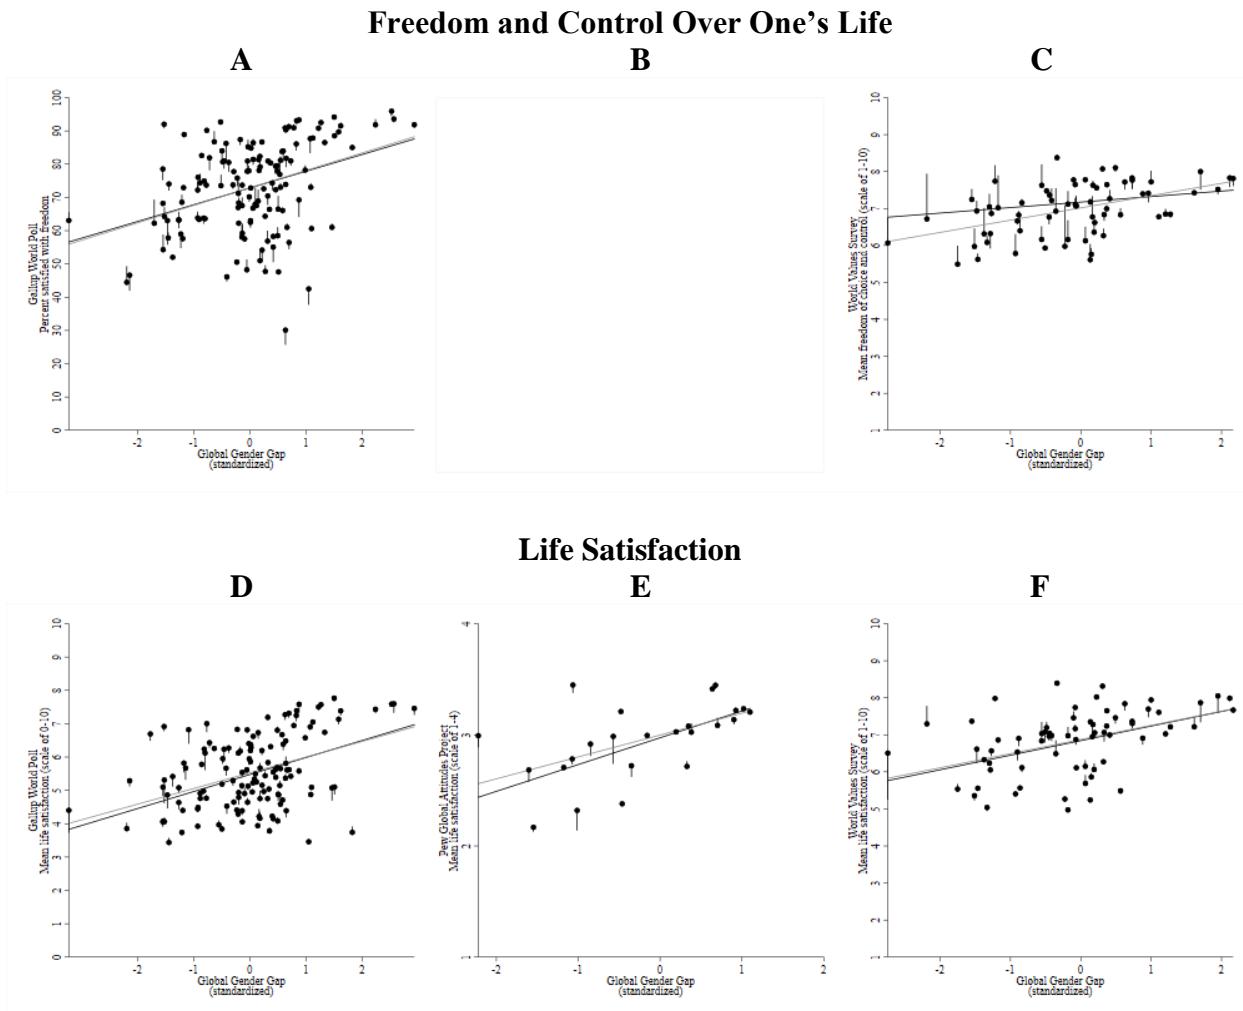

Fig. S4. Gender gap in life assessment, by index-equality (Gender Equality Index)

(A) Gallup World Poll, (B) World Health Survey, (C) World Values Survey
 (D) Gallup World Poll, (E) Pew Global Attitudes Project, (F) World Values Survey

Dots indicate mean value for women in each country; tails indicate mean value for men in each country. Gray fitted lines represent the linear prediction of women's mean responses; black fitted lines represent the linear prediction of men's mean responses. The Gender Equality Index has been standardized.

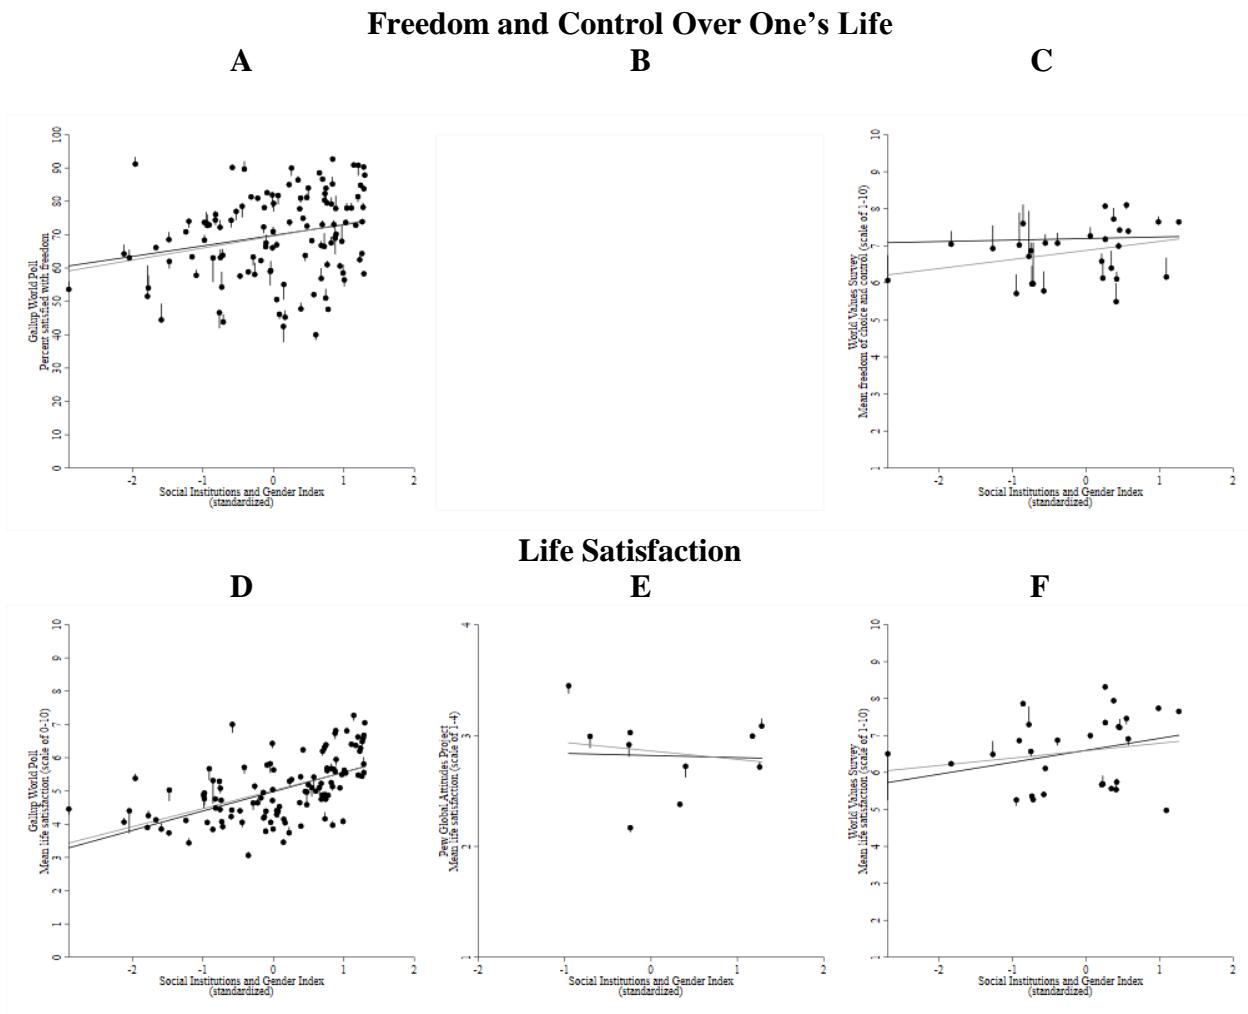

Fig. S5. Gender gap in life assessment, by index-equality (Global Gender Gap index)

(A) Gallup World Poll, (B) World Health Survey (did not overlap with Global Gender Gap index), (C) World Values Survey (D) Gallup World Poll, (E) Pew Global Attitudes Project, (F) World Values Survey

Dots indicate mean value for women in each country; tails indicate mean value for men in each country. Gray fitted lines represent the linear prediction of women's mean responses; black fitted lines represent the linear prediction of men's mean responses. The Global Gender Gap index has been standardized.

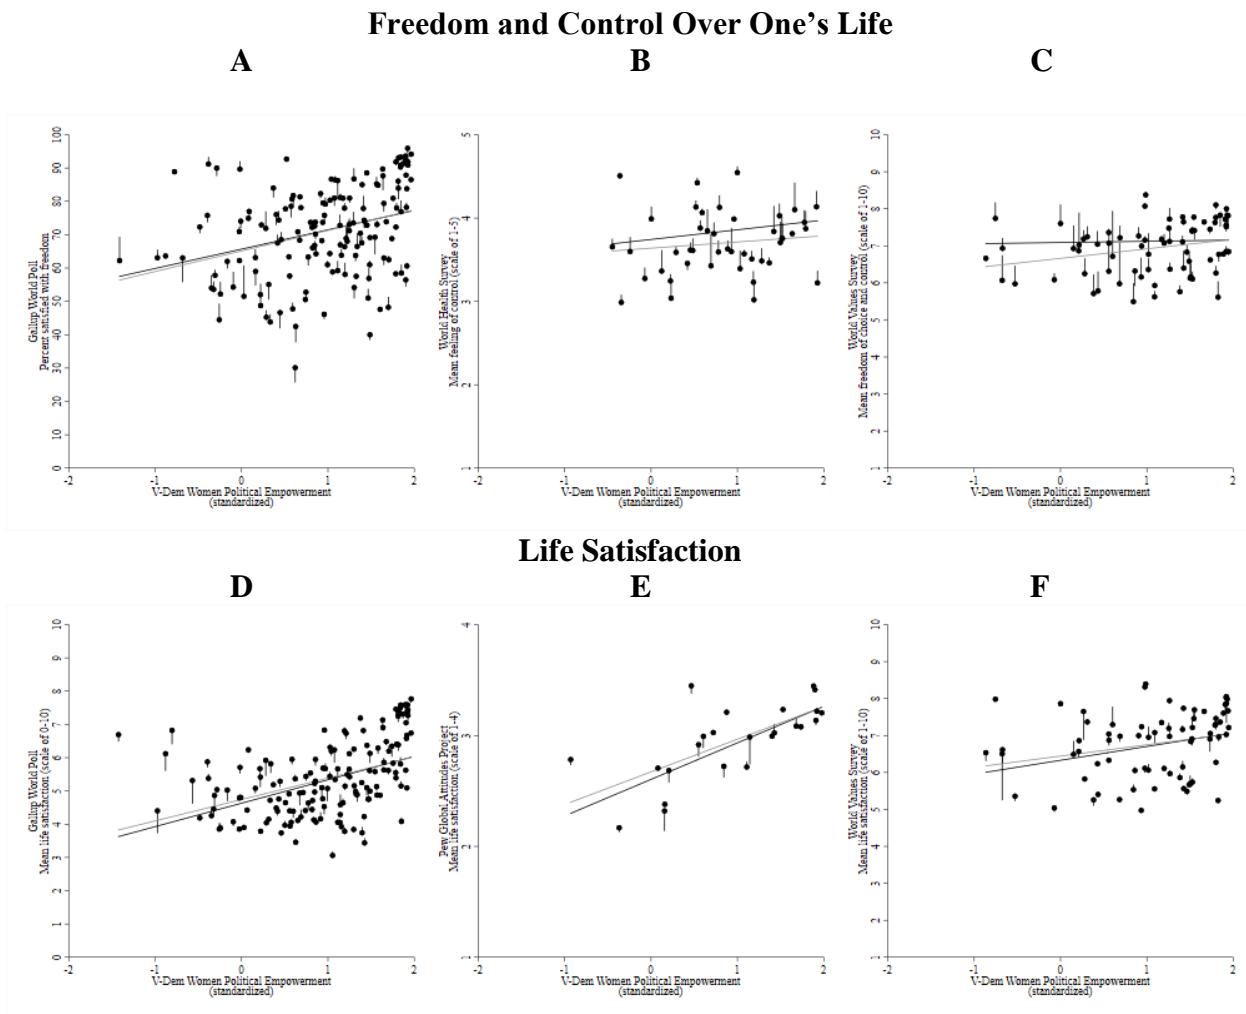

Fig. S6. Gender gap in life assessment, by index-equality (Social Institutions and Gender Index)

(A) Gallup World Poll, (B) World Health Survey (did not overlap with SIGI), (C) World Values Survey (D) Gallup World Poll, (E) Pew Global Attitudes Project, (F) World Values Survey

Dots indicate mean value for women in each country; tails indicate mean value for men in each country. Gray fitted lines represent the linear prediction of women's mean responses; black fitted lines represent the linear prediction of men's mean responses. The SIGI (Social Institutions and Gender Index) scale has been standardized.

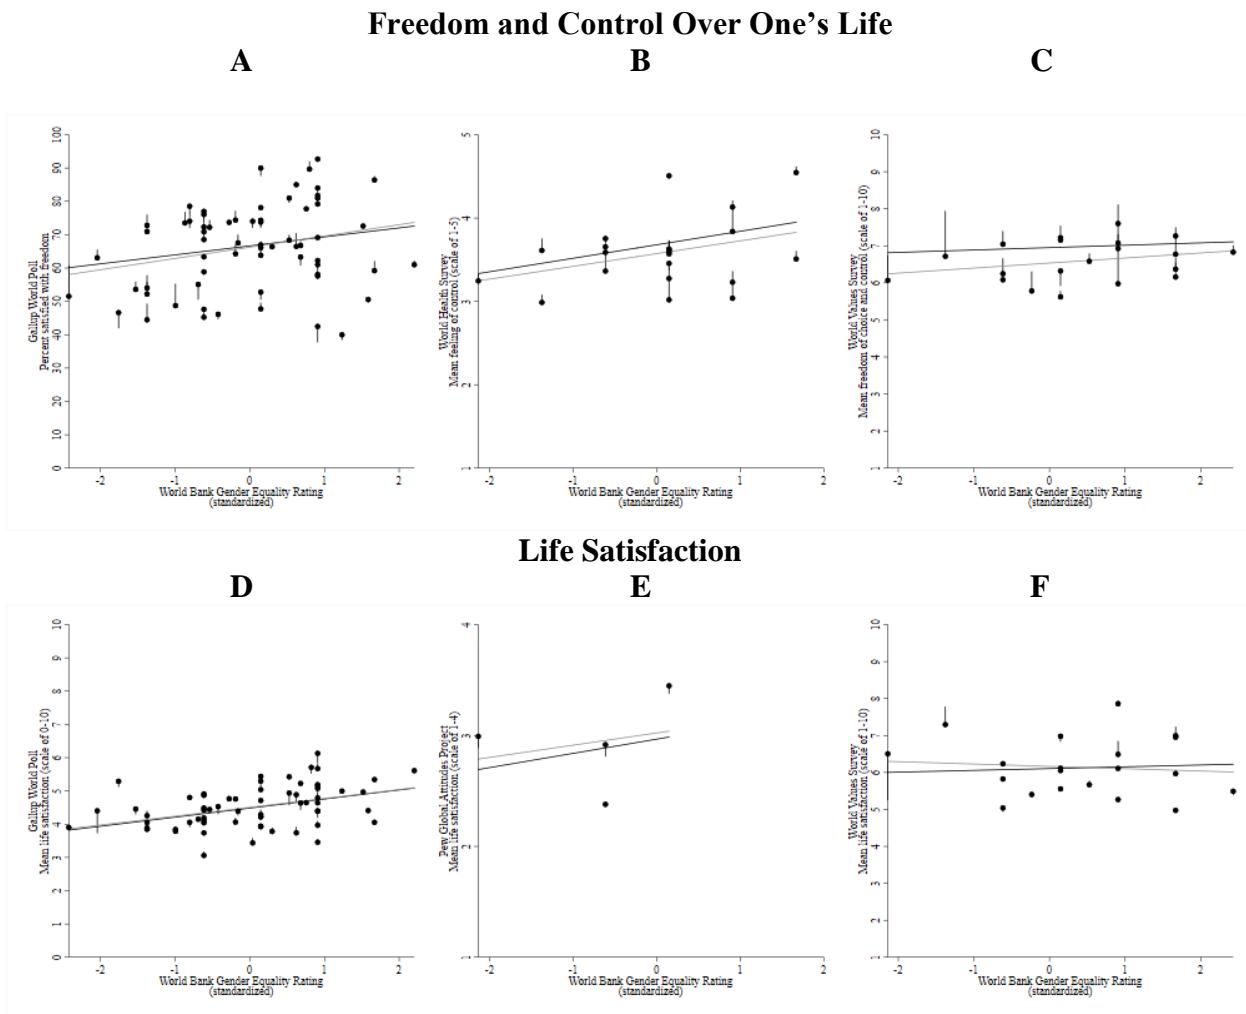

Fig. S7. Gender gap in life assessment, by index-equality (Varieties of Democracy, Women Political Empowerment Index)

(A) Gallup World Poll, (B) World Health Survey, (C) World Values Survey
 (D) Gallup World Poll, (E) Pew Global Attitudes Project, (F) World Values Survey

Dots indicate mean value for women in each country; tails indicate mean value for men in each country. Gray fitted lines represent the linear prediction of women's mean responses; black fitted lines represent the linear prediction of men's mean responses. The V-Dem (Varieties of Democracy) Women Political Empowerment Index has been standardized.

Fig. S8. Gender gap in life assessment, by index-equality (World Bank Gender Equality Rating)

(A) Gallup World Poll, (B) World Health Survey, (C) World Values Survey
 (D) Gallup World Poll, (E) Pew Global Attitudes Project, (F) World Values Survey

Dots indicate mean value for women in each country; tails indicate mean value for men in each country. Gray fitted lines represent the linear prediction of women's mean responses; black fitted lines represent the linear prediction of men's mean responses. The World Bank Country Policy and Institutional Assessment (CPIA) Gender Equality Rating has been standardized.

Fig. S9. Marginal effect of being female on self-assessment of control and life satisfaction (multiple gender equality indices)

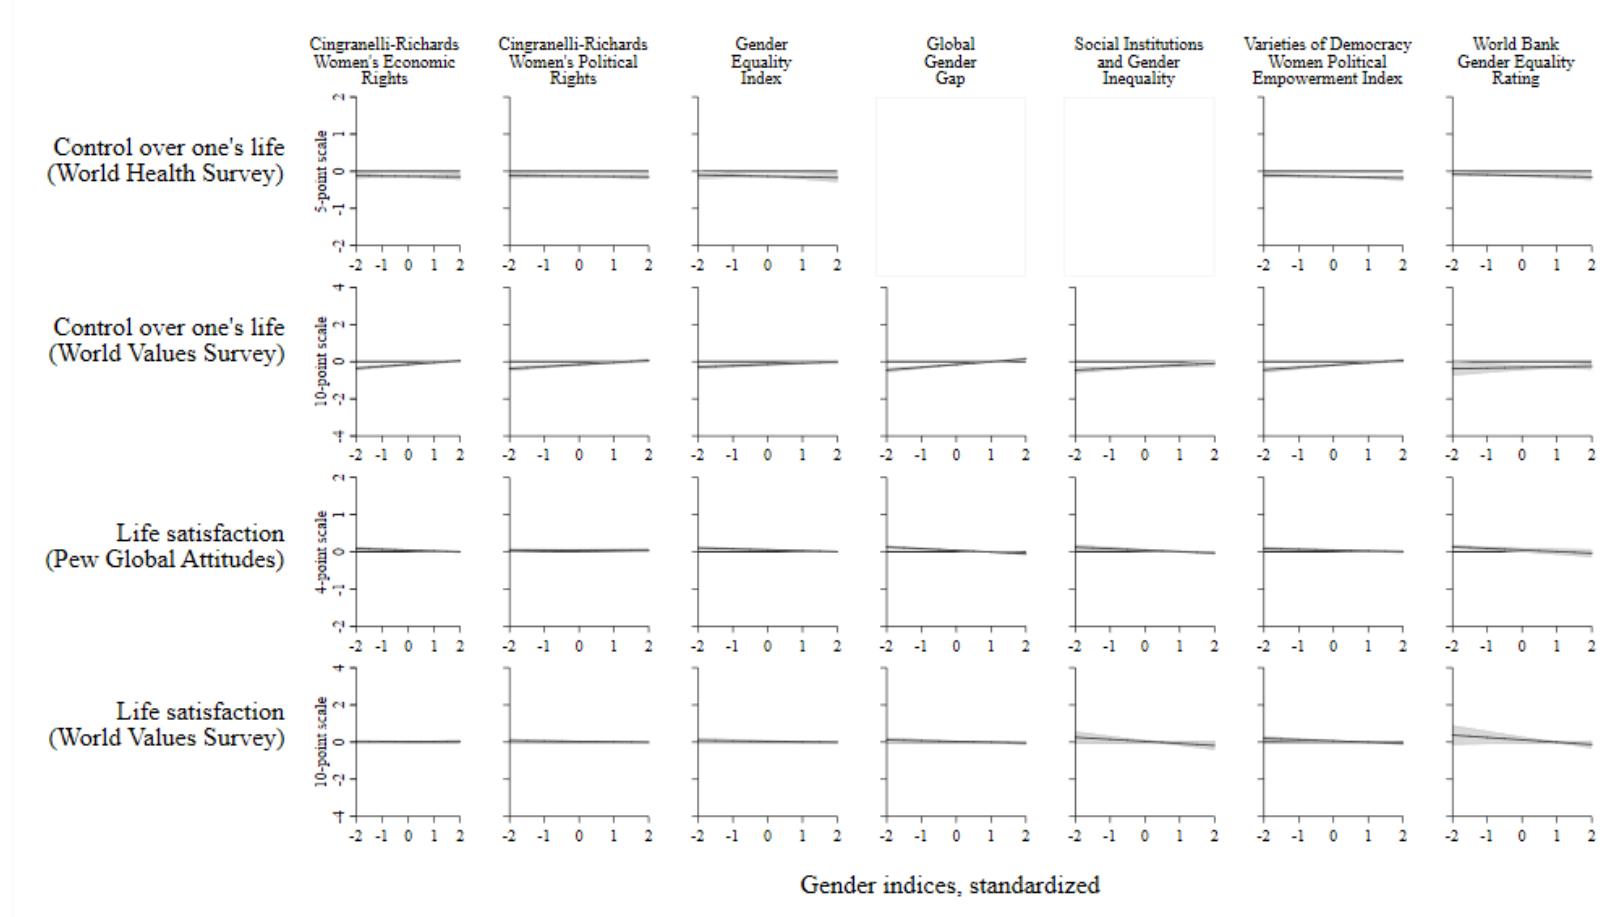

Fig. S10. Comparing survey-based and index-based rankings of gender equality, 2000

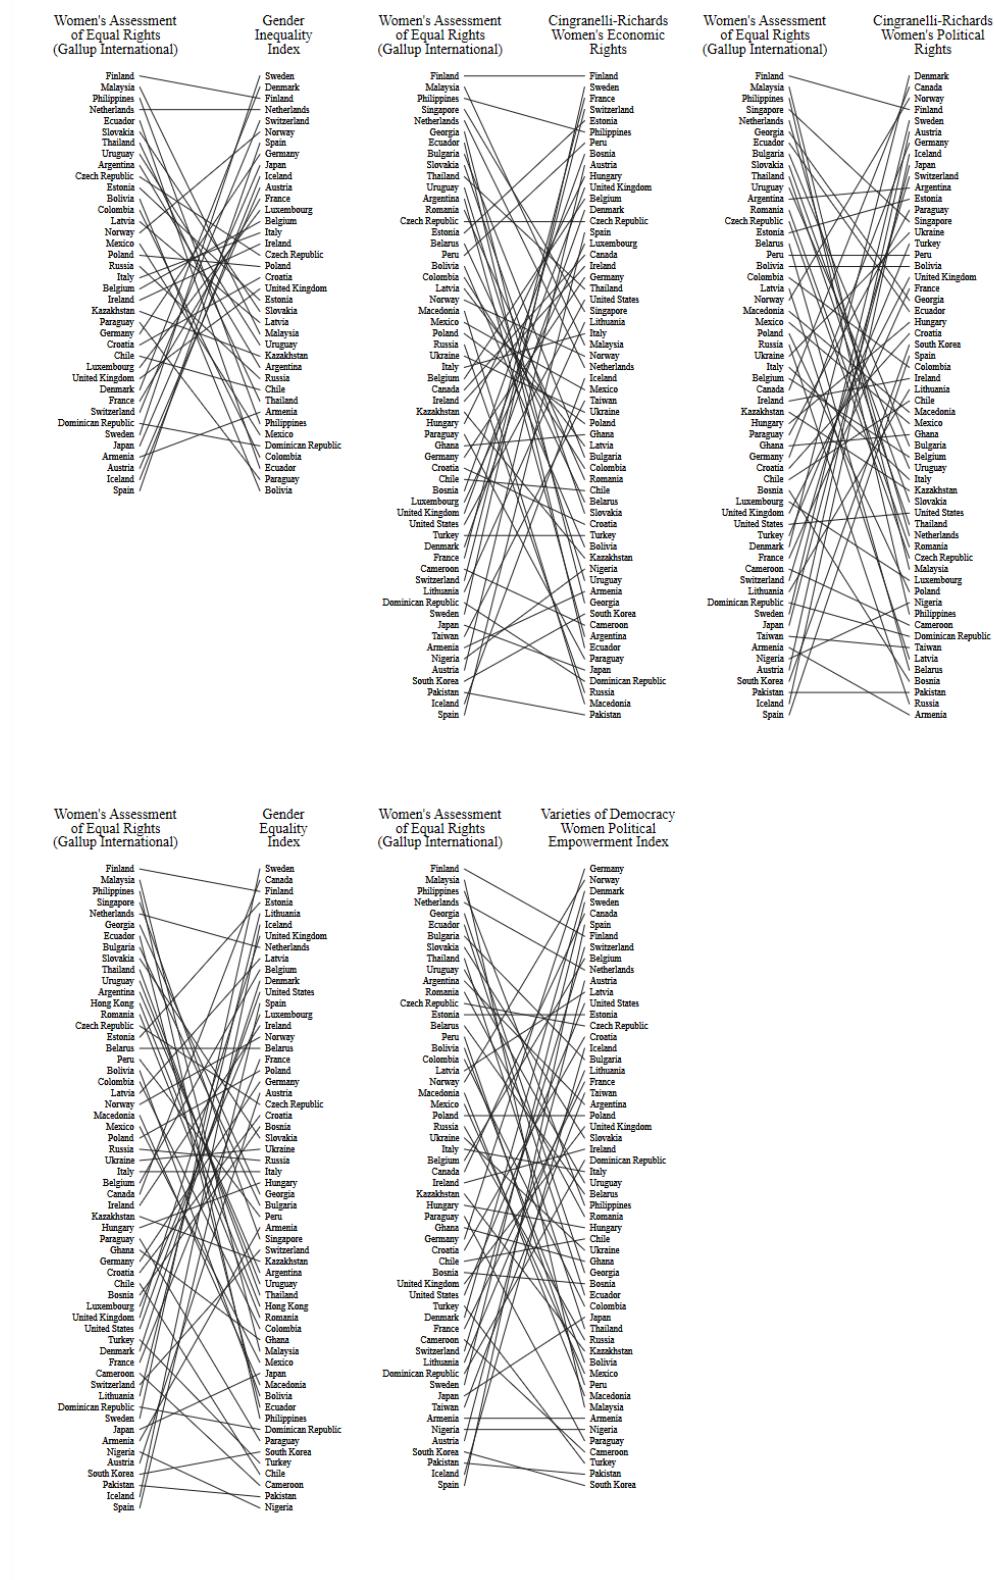

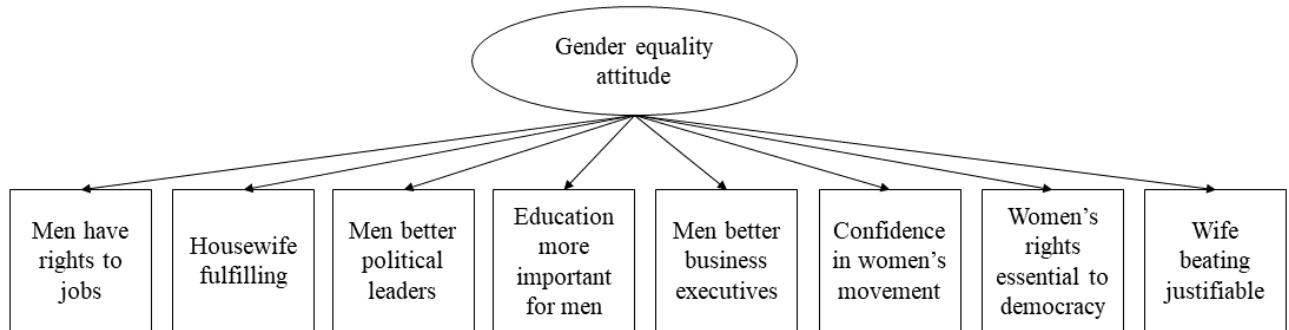

Fig. S11. Comparing survey-based and index-based rankings of gender equality, 2005-2006

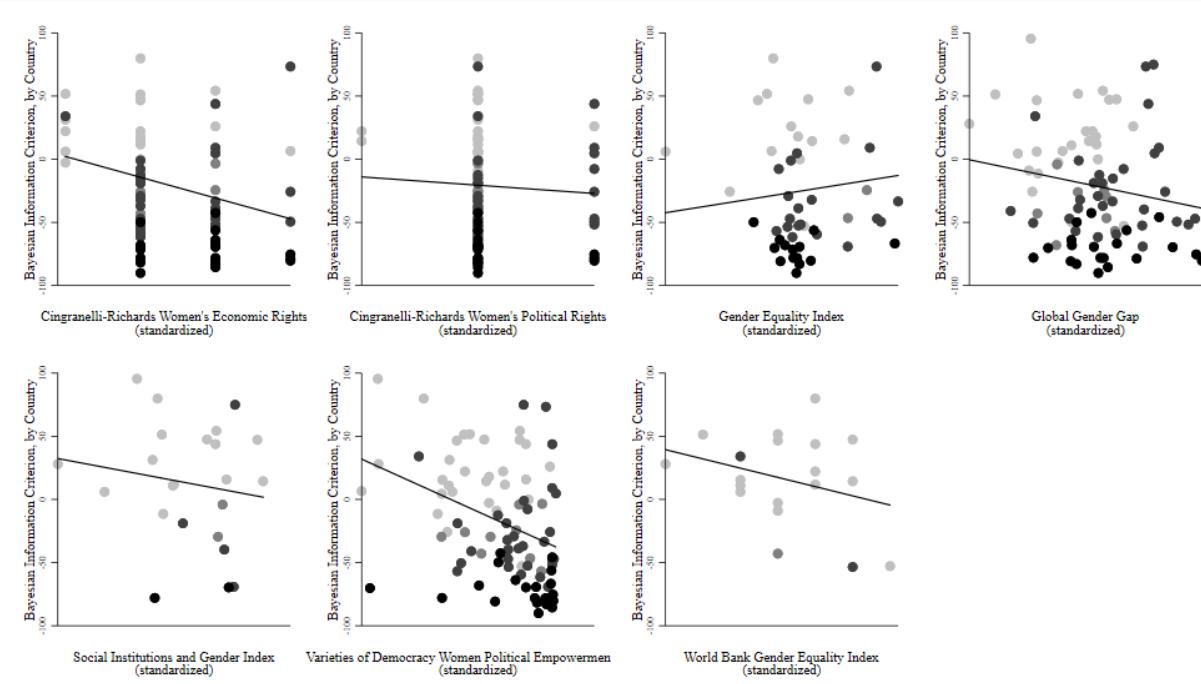

Fig. S12. Confirmatory factor analysis model for women's latent gender-equality attitude

Caption: The confirmatory factor analysis model examines whether eight gender-related attitudes in the World Values Survey (2005-2014) indicate a latent gender-equality attitude in each country.

Fig. S13. Fit statistics for women's latent gender-equality attitudes by country

Caption: Darker points indicate that more fit statistics passed thresholds. Countries rated as more gender-unequal (left side of figures) by all but one of these gender equality indices are more likely than countries rated as more gender-equal (right side of figures) to have positive BIC statistics for gender-related attitudes in the World Values Survey (2005-2014), indicating worse fit for the latent model. Other fit statistics display the same pattern: fewer of them pass standard thresholds in index-unequal countries than in index-equal countries. One outlier case is omitted from the scatterplot but included in calculations for the fitted lines and correlations with index-equality: Russia (2011), with a BIC statistic of 168 and a negative standardized gender equality rating in every index except the Global Equality Index and the Global Gender Gap.

**Table S1. Hierarchical linear models of self-assessment of control and life satisfaction
(Gender Inequality Index)**

	Control over one's life		Life satisfaction	
	World Health Survey	World Values Survey	Pew Global Attitudes	World Values Survey
Gender Inequality Index (inverted)	0.206*** (0.04)	0.004 (0.08)	0.181* (0.08)	0.391*** (0.08)
Woman	-0.142*** (0.01)	-0.190*** (0.03)	0.053*** (0.01)	0.052 (0.03)

Abbreviations for fit statistics: BIC: Bayesian Information Criterion. CFI: Comparative Fit Index. TLI: Tucker-Lewis Index. RMSEA: Root Mean Squared Error of Approximation.

Table S12. Hierarchical linear model of women's opposition to wife beating (Cingranelli-Richards Women's Economic Rights)

Independent variables:	Time period	
	1997-2009	2010-2015
National-level variables:		
Cingranelli-Richards Women's Economic Rights	0.072 (0.09)	0.145 (0.13)
Percent of men opposing wife beating	0.044*** (0.01)	0.054*** (0.01)
Individual-level variables:		
Age	0.009*** (0.00)	0.012*** (0.00)
Education	0.304*** (0.00)	0.362*** (0.01)
Household wealth	0.228*** (0.00)	0.227*** (0.00)
Constant	-3.128*** (0.34)	-4.075*** (0.69)
Number of country-years	35	24
Number of respondents	496,104	325,308

Women's Economic Rights index is standardized for consistency with other gender indices.
 Standard errors are listed in parentheses below coefficients. * p<0.05, ** p<0.01, *** p<0.001.
 Survey data source: Demographic and Health Survey.

Table S13. Hierarchical linear model of women's opposition to wife beating (Cingranelli-Richards Women's Political Rights)

Independent variables:	Time period	
	1997-2009	2010-2015
National-level variables:		
Cingranelli-Richards Women's Political Rights	0.064 (0.07)	0.014 (0.10)
Percent of men opposing wife beating	0.045*** (0.00)	0.059*** (0.01)
Individual-level variables:		
Age	0.009*** (0.00)	0.012*** (0.00)
Education	0.304*** (0.00)	0.362*** (0.01)
Household wealth	0.228*** (0.00)	0.227*** (0.00)
Constant	-3.193*** (0.34)	-4.558*** (0.57)
Number of country-years	35	24
Number of respondents	496,104	325,308

Women's Political Rights index is standardized for consistency with other gender indices.
 Standard errors are listed in parentheses below coefficients. * p<0.05, ** p<0.01, *** p<0.001.
 Survey data source: Demographic and Health Survey.

Table S14. Hierarchical linear model of women's opposition to wife beating (Gender Equality Index)

Independent variables:	Time period	
	1997-2009	2010-2015
National-level variables:		
Gender Equality Index	0.306** (0.10)	-0.203* (0.09)
Percent of men opposing wife beating	0.039*** (0.00)	0.082*** (0.01)
Individual-level variables:		
Age	0.007*** (0.00)	0.009*** (0.00)
Education	0.307*** (0.01)	0.435*** (0.01)
Household wealth	0.261*** (0.01)	0.203*** (0.01)
Constant	-2.928*** (0.29)	-6.049*** (0.82)
Number of country-years	17	14
Number of respondents	250,748	192,279

Gender Equality Index is standardized for consistency with other gender indices. Standard errors are listed in parentheses below coefficients. * p<0.05, ** p<0.01, *** p<0.001. Survey data source: Demographic and Health Survey.

Table S15. Hierarchical linear model of women's opposition to wife beating (Global Gender Gap)

Independent variables:	Time period	
	1997-2009	2010-2015
National-level variables:		
Global Gender Gap	0.394** (0.14)	0.000 (0.09)
Percent of men opposing wife beating	0.048*** (0.01)	0.067*** (0.01)
Individual-level variables:		
Age	0.007*** (0.00)	0.007*** (0.00)
Education	0.293*** (0.01)	0.272*** (0.00)
Household wealth	0.248*** (0.01)	0.258*** (0.00)
Constant	-3.326*** (0.53)	-4.760*** (0.59)
Number of country-years	17	35
Number of respondents	314,469	658,855

Global Gender Gap index is standardized for consistency with other gender indices. Standard errors are listed in parentheses below coefficients. * p<0.05, ** p<0.01, *** p<0.001. Survey data source: Demographic and Health Survey.

Table S16. Hierarchical linear model of women's opposition to wife beating (Social Institutions and Gender Inequality)

Independent variables:	Time period	
	1997-2009	2010-2015
National-level variables:		
Social Institutions and Gender Inequality	0.249*	0.080
	(0.12)	(0.09)
Percent of men opposing wife beating	0.016*	0.058***
	(0.01)	(0.01)
Individual-level variables:		
Age	0.008***	0.008***
	(0.00)	(0.00)
Education	0.314***	0.285***
	(0.01)	(0.00)
Household wealth	0.152***	0.242***
	(0.01)	(0.00)
Constant	-1.603***	-4.184***
	(0.44)	(0.48)
Number of country-years	5	47
Number of respondents	67,177	808,531

Social Institutions and Gender Inequality index is standardized for consistency with other gender indices. Standard errors are listed in parentheses below coefficients. * p<0.05, ** p<0.01, *** p<0.001. Survey data source: Demographic and Health Survey.

Table S17. Hierarchical linear model of women's opposition to wife beating (Varieties of Democracy Women Political Empowerment)

Independent variables:	Time period	
	1997-2009	2010-2015
National-level variables:		
Varieties of Democracy Women Political Empowerment	0.058 (0.09)	0.004 (0.12)
Percent of men opposing wife beating	0.044*** (0.01)	0.058*** (0.01)
Individual-level variables:		
Age	0.009*** (0.00)	0.007*** (0.00)
Education	0.304*** (0.00)	0.283*** (0.00)
Household wealth	0.228*** (0.00)	0.227*** (0.00)
Constant	-3.149*** (0.34)	-4.226*** (0.49)
Number of country-years	35	42
Number of respondents	496,104	725,589

Women Political Empowerment index is standardized for consistency with other gender indices. Standard errors are listed in parentheses below coefficients. * p<0.05, ** p<0.01, *** p<0.001. Survey data source: Demographic and Health Survey.

Table S18. Hierarchical linear model of women's opposition to wife beating (World Bank Gender Equality Index)

Independent variables:	Time period	
	1997-2009	2010-2015
National-level variables:		
World Bank Gender Equality Index	0.182*	0.031
	(0.09)	(0.09)
Percent of men opposing wife beating	0.037***	0.050***
	(0.00)	(0.01)
Individual-level variables:		
Age	0.007***	0.009***
	(0.00)	(0.00)
Education	0.297***	0.335***
	(0.00)	(0.00)
Household wealth	0.226***	0.245***
	(0.00)	(0.00)
Constant	-2.811*** (0.27)	-3.872*** (0.43)
Number of country-years	23	39
Number of respondents	344,253	543,166

Gender Equality Index is standardized for consistency with other gender indices. Standard errors are listed in parentheses below coefficients. * p<0.05, ** p<0.01, *** p<0.001. Survey data source: Demographic and Health Survey.
