

Supplemental File C: Alphabet Stimuli

Alphabet and phonics test stimuli

Part 1: Stimuli are presented for Q1 and then each question thereafter, until each question has been asked or the stop rules have ended the test. The experimenter asks the child to give them the underlined symbol using the letter name (e.g. 'give me B'). Stop rules: after three consecutive incorrect answers (to include not answering), the test ends.

Part 2: For each question in part 1 that was not correctly answered, present the stimuli again and ask for the phonics name (i.e. give me 'b'). Same stop rules as above apply.

Correct answer is underlined, other two stimuli are distractors
