

## **Appendix**

Age:

Gender:

Academic year of medical school:

Are you interest in following Cardiology, Internal Care or Trauma specialty?

Did you perform a transthoracic echocardiogram? If yes: how many times?

Did you watch someone performing a transthoracic echocardiogram? If yes: how many times?

**On a scale of 1 to 5, where 1 is very low, on average, 3, and 5 very high:**

Were the instructions clear through the training session?

Was the video instruction helpful?

How helpful was it to study the set of study materials?

How helpful was the text explaining the images in the study material?

How difficult was the first part of the session training in general?

How difficult was the second part of the session training in general?

How much effort did you put in to learning the first part of the session training?

How much effort did you put in to learning the second part of the session training?

How confident would you feel to perform a transthoracic echocardiogram?

## Open questions

What did you find particularly helpful?

---

---

---

---

What did you not find very helpful?

---

---

---

---

Which suggestions would you have to improve the general instructions?

---

---

---

---

Which suggestions would you have to improve the first part of the session training?

---

---

---

---

Which suggestions would you have to improve the second part of the session training?

---

---
