Correlations. Table S1 summarizes correlations among variables included in Study 1. As hypothesized, our index of interests in international competitions was negatively associated with attitudes toward Southeast Asians, $r = -.150$, $p = .024$, 95% CI [-.280, -.019]. In addition, attitudes toward Southeast Asians were negatively associated with age, $r = -.171$, $p = .010$, 95% CI [-.301, -.041], and system justification, $r = -.152$, $p = .023$, 95% CI [-.282, -.021]. We also note that older adults were more interested in international sports competitions, $r = .134$, $p = .044$, 95% CI [.004, .265].
