SECTION THREE: REASON FOR AUTHORSHIP CHANGE

Please provide a detailed explanation for the change in authors in the box below.
Ana Ochoa-Guzmán MD, PhD, has made substantial contribution to improve this paper, from the first revision of the original version sent to VASCULAR, in the form of: -Data base revision and re-construction -Statistical analyses review and corrections (as indicated by the Reviewers). -Language and scientific content editing. The work of Dr. Ochoa-Guzmán has been determinant for reaching the quality of the new version of our paper, and therefore, she has gained the merit to be included as co-author, in the understanding that she has approved all the manuscript versions submitted to VASCULAR, and that she had agreed to take responsibility for the information and all interpretations and claims presented in our manuscript.

We agree to the proposed change of authorship to the above paper. NB: all authors (added and removed) must sign below.
