<i>M</i>	3.85	1.42	14.32	1.39	4.16	0.05	-0.08	17.95	1.34	0.04	-
(<i>SD</i>)	(1.08)	(0.76)	(10.28)	(0.32)	(0.50)	(1.07)	(1.37)	(10.92)	(0.34)	(0.86)	

Note. T1=Time 1 report. T2=Time 2 report. T3=Time 3 report. Mother-youth correlations are the above diagonal, father-youth correlations are the below diagonal, and bolded correlations in the diagonal are between mother-youth and father-youth differential treatment variables and fairness/jealousy ratings. Mother-youth differential treatment means (standard deviations) are in the last column and father-youth differential treatment means (standard deviations) are in the last row.

† $p < .10$. * $p < .05$. ** $p < .01$.

Supplemental Table 2

Descriptive Statistics and Correlations of Study Variables for Boys

	1	2	3	4	5	6	7	8	9	10	M (SD)
1. T2 Fairness	0.53**	-0.32**	-0.27**	-0.07	0.11	0.05	-0.00	-0.17*	-0.30**	0.18*	3.86 (0.97)
2. T2 Jealousy	-0.05	0.64**	0.18*	-0.04	0.11	0.12	0.09	0.17†	-0.08	-0.09	1.47 (0.91)
