Table S2. Example comments of the Survey respondents and associated average and total sentiment score.

Comment	Average	Total
	Score	Score
Nurses have let themselves and the professions get	-3.2	-12
lost. You cannot tell the nurse from the non-		
medical staff in a hospital and the MA's in Dr's		
Offices call themselves nurses. What a sad day it is		
for us and our name nurse, to let so many use our		
status and we say nothing. I do not call myself		
doctor and if I did all hell would break loose.		
While I love what I do I am concerned about the	-1.29	-22
increasing level of violence I experience at work. I		
work in the ER and we have had some serious		
attacks made on our staff. While I think that my		
employer is working on this I fear it will be too		
little too late. I'm not an alarmist and have always		
been philosophical about the risks inherent to my		
line of work. However, I've noticed a marked		
increase in the number and severity of violent		

attacks over the past 3 years. Whether it is		
attributed to ER overcrowding, the use of		
methamphetamine (etc.), the lack of psychiatric		
facilities, homelessness, the violence which seems		
to be inherent to the entire American way of life or		
the celebration of violence one is witness to in		
movies etc. I'm not sure. But I am certain that		
things are much worse than they used to be. Sad		
but true. Someone is going to get seriously hurt and		
soon.

cs I am working as a clinical supervisor in home health. Although, it meets my needs for employment my ideal job would allow me more time for educating + mentoring other nurses, being a clinical resource and give me time to do research and publish. Having returned twice in my career to go to school (once for a BSN, 2nd for MSN) while	2.27	25

more perfect job isn't that appealing at age 60,		
although I will work for a few more years it would		
be great to end my career in the perfect job. But		
even without my perfect job, nursing has given me		
great satisfaction to help others to change + grow		
lives while supporting myself. I have engaged the		
variety and opportunity the profession has given		
me. I had to do it all over again I would still		
become a nurse.		
I love nursing. When I started over 30 years ago, it	2.66	32
was not paid well-I didn't choose it for love of		
money. I am grateful for a career with wages that		
support my family so well but that's not the best		
bit. My patients are wonderful. I love helping them		
heal and appreciate their gratitude. Just explaining		
a procedure or disease to them & watching their		
face light up with understanding is worth so much.		
I hope to end my career after another 10 years in		
good health myself.
