

Supplementary Table 1. Summary of adjuvant therapy, including specific regimens and duration of therapy.

Any adjuvant therapy	n=24
Any chemotherapy	n=24
Any radiation therapy	n=20
First treatment	
Time to first treatment	5.1±5.9 months
Duration of therapy	2.3±1.6 months
Chemotherapy	n=10
Gemcitabine	n=1
Gemcitabine+capecitabine	n=2
Gemcitabine+platinum agent	n=7
Chemoradiation	n=14
Capecitabine+XRT	n=11
5-fluorouracil+XRT	n=3
Second treatment	
Treatment interval	2.9±6.0 months
Duration of therapy	1.9±0.7 months
Chemotherapy	n=5
Gemcitabine	n=1
Gemcitabine+capecitabine	n=1
Gemcitabine+platinum agent	n=3
Chemoradiation	n=6
Capecitabine+XRT	n=6

Platinum agents used include cisplatin, oxaliplatin, and carboplatin. Treatment interval is the time between the end of the first treatment and the beginning of the second treatment.

Data presented as either number of patients or mean ± standard deviation

Abbreviations: XRT – external beam radiation therapy
