

*S1. The correlations of special education activities to parent education and children's development*

Variable, n (%)	<i>Never</i>	<i>Some</i>	<i>Almost all/all</i>	<i>Total</i>	<i>p</i>
<i>Development</i>					
<i>No regression</i>	16 (16.8)	47 (49.5)	32 (33.7)	95 (81.9)	<b>0.02*</b>
<i>Regression</i>	4 (19)	16 (76.2)	1 (4.8)	21 (18.1)	
<i>Mother education</i>					
<i>&lt;High school</i>	6 (31.6)	23 (37.1)	4 (12.1)	33 (28.9)	<b>0.04*</b>
<i>≥High school</i>	13 (68.4)	39 (62.9)	29 (87.9)	81 (71.1)	
<i>Father education</i>					
<i>&lt;High school</i>	4 (21.1)	23 (37.1)	5 (15.2)	32 (28.1)	<b>0.06</b>
<i>≥High school</i>	15 (78.9)	39 (62.9)	28 (84.8)	82 (71.9)	

• \*  $p < 0.05$  ; \*\*  $p < 0.01$

• The phi correlation coefficient was used for correlations.
